Caulking may be necessary on some installations to seal the frames or trim package against water and/or air infiltration. **With the sole exception of factory-applied caulking, caulking is considered a maintenance issue and is the responsibility of the homeowner.** It is not considered part of the product and any damages caused by inadequate or poor caulking installation or maintenance—including any damages caused by water and/or air infiltration—are

This Warranty shall not apply to defects arising from damage to the capillary tube, such as crimping or dirt/debris obstructing the opening of the capillary tube.

Any replacement parts or components Associated Materials supplies under this Warranty will have the standard color available at that time. A color variance may occur between the new replacement part or component in comparison to the original window. Associated Materials reserves the right to discontinue or change any product as manufactured. If the part or component of the window originally installed is not available and Associated Materials determines to replace the part or component, Associated Materials may, at its sole discretion, substitute a compatible part or component, or Associated Materials may provide a refund to cover the cost of repairing or replacing the applicable part or component.

Condensation on windows may occur as the natural result of humidity within the house or building area and changes in interior / exterior temperatures, and does not indicate a defect in the window. This Warranty does not cover condensation or frost or freezing from condensation.

This Warranty is limited to Associated Materials furnishing repair or replacement parts or window components, free of charge, or the costs thereof as indicated herein, within the time period specified, or as applicable, upon payment in advance of any pro rata amount then due from the Successor Owner.

Suggested Cleaning of Window World Vinyl Windows and Patio Doors

Glass:

Clean glass with a mixture of mild dish soap and water. Rinse completely with clear water, then wipe dry with a soft cloth to avoid water spots. Avoid washing windows and patio doors in direct sunlight. Never use petroleum-based cleaners or caustic chemicals on the glass.

Vinyl Sashes and Mainframes:

Vacuum dirt from sill and track areas before washing. Clean vinyl with a mixture of mild dish soap and water. Mild, non-abrasive soaps are usually safest for most dirt and stain removal. Always rinse completely with clean water and wipe dry.

Screens:

Remove from window, then wash on a flat, clean surface with mild soap and water, and a soft brush. Rinse, wipe dry, and then reinstall.

HIGH CONCENTRATION CLEANERS MAY CAUSE DAMAGE TO THE WINDOW'S GLASS AND VINYL. DO NOT USE SOLVENTS, PAINT REMOVERS, OR CLEANERS CONTAINING ABRASIVE PARTICLES.

This cleaning information is suggested in an effort to be of assistance; however, Manufacturer can assume no responsibility for results obtained which are dependent on the solution chemicals as prepared and method of application.
